

Ponavljanje – Python kornjača

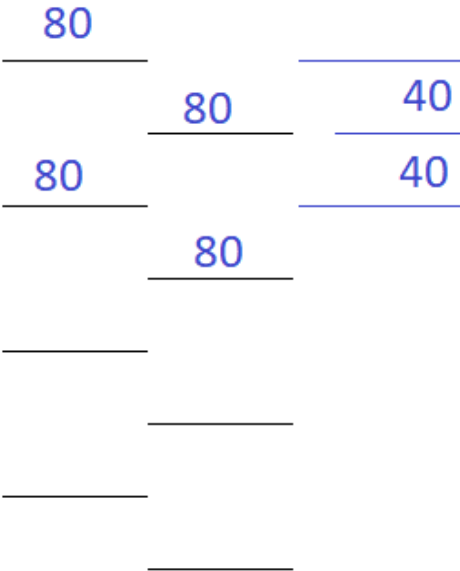

1. Nacrtaj zadatak kao na slici. Boje možemo koristiti po želji:

	<p>Rješenje:</p> <pre>from turtle import* #Slovo G color('blue') fd(60);rt(90) fd(100);rt(90) fd(100);rt(90) fd(200);rt(90) fd(100) #Dolazak do slova O pu();fd(50) pd() #Slovo O color('red') fd(100);rt(90) fd(200);rt(90) fd(100);rt(90) fd(200)</pre>
------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

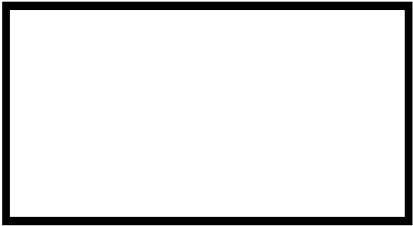

2. Izradi zadatak kao na slici korištenjem for petlje:

	<p>Rješenje:</p> <pre>from turtle import* #Trokuti for i in range(3): fd(70) lt(360/3) fd(70) for i in range(3): fd(70) lt(360/3) fd(70) for i in range(3): fd(70) lt(360/3) fd(70) for i in range(3): fd(70) lt(360/3) bk(210)</pre>
-------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

3. Izradi zadatak kao na slici korištenjem for petlje:

	<p>Rješenje:</p> <pre>from turtle import* for i in range(4): fd(80);pu() rt(90);fd(40) lt(90);pd() fd(80);pu() bk(160);rt(90) fd(40) lt(90);pd()</pre>
-----------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

4. Izradi zadatak uz pomoć varijabli:

<p>Mogući izgled crteža (ovisno o duljini stranica:</p> <p style="text-align: center;">a</p>  <p style="text-align: right;">b</p>	<p>Rješenje:</p> <pre>from turtle import* a=int(input('Unesi duljinu a:')) b=int(input('Unesi duljinu b:')) fd(a);lt(90) fd(b);lt(90) fd(a);lt(90) fd(b);lt(90)</pre>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------
